CRAZE WAS OVER, THINK AGAIN.

The SuperBee Smart Board brand of electronic transportation devices use only the highest quality products available. With thousands sold and no product recalls your safety is our promise.

Don't miss your opportunity to get in on the hottest selling products now.

U101 - SUPER-SIX CLASSIC SERIES

- These are the Classic Series that is still a best seller.
- This series of boards has been sold under a variety of different brand names and built by many different factories. We require them to be built to our specs including UL Certified batteries and chargers and the best electronics currently available.
- Net weight 10.8 kg, Max load 120kg, Top speed 12 km/h, 700 watts power output
- Available in Black, Blue, Blue Chrome, Gold Chrome, Green Chrome, Red & White

UL701 - SUPER UL-CLASSIC SERIES

- The USA has stopped importation of hoverboards without UL2272 certification into the country due to the amount of poorly built product that unscrupulous US suppliers were bringing into the country which were causing fires and damage. These UL Certified models have been fully tested to pass the rigorous requirements and although UL Certification is not required in Canada we still stock that model. Net weight 10.8 kg, Max load 120kg, Top speed 12 km/h, 700 watts power output. Available in Black, Blue, Red & White

U201 - SUPER-SIX LAMBO SERIES

- The second design of the Classic model with the upgraded Lambo Style body. Built around the classic platform but with a stylish new body providing an enhanced appearance while retaining the ride quality of the original.
- Net weight 10.8 kg, Max load 120kg, Top speed 12 km/h, 700 watts power output
- Available in Black, Blue, Green, Orange, Purple and White

U301/302 - SUPER-LAMBO 8 SERIES

- If you're looking to ride on some rougher terrain then the larger wheels on the 8" models will tackle the job at hand. And the Bluetooth speaker allows you to play your favorite tunes while you cruise around. The difference between the 301 and 302 series is the redesigned foot pads but the physical components inside the board are the same for either series. Includes LED fender lights.
- Net Weight 12 kgs, Max Load 120 kgs, Top speed 15 km/hr, 700 watts of power output
- U301 Available in Blue, Green, Purple and Red, U302 available in Black, Blue, Green Orange, Purple & White (Not all models are shown)

ELECTRIC FOLDING SCOOTERS

Our folding electric scooters are designed for commuters.

They fold up to a compact size allowing them to be easily taken on public transportation or stored in a locker or at your work place. Manufactured with an incredibly light aluminium alloy and weighing in at under 8 kgs with a compact folded size of only 1000 x 405 x 235 mm they are the ultimate commuter vehicle. The 8.8 a/Hr battery will last for up to 20 km and they can reach speeds exceeding 23 km/hr.

If you're looking to speed up your commute to work or school and reduce your carbon footprint then an Electric Folding Scooter will accomplish exactly what you've been looking for.

- Up to 20 km range
- Maximum speed of 23 km/hr
- Weighs under 8 kgs
- Easy to fold for storage or transport
- Digital Charge Management system
- LED Headlight
- One Year Warranty
- U503 Carry Bag Optional
